

Parth Sunil Khairnar

Full Stack Developer | Backend & Systems Engineering

+91 7208787250 | parthkhairnar2005@gmail.com | [LinkedIn](#) | [GitHub](#) | Airoli, Navi Mumbai

PROFESSIONAL SUMMARY

Full Stack Developer (B.Tech Computer Technology, pursuing) with hands-on experience building systems using React.js, Django, and PostgreSQL. Architected a multimodal RAG-based enterprise knowledge platform (Tork AI) with semantic search via pgvector and scalable object storage via MinIO. Contributed to a 4-layer bot detection system at Authority — validated against Selenium, Playwright, and Puppeteer stealth bots. Passionate about backend architecture, API design, and building systems that scale. Seeking a Full Stack Developer internship to contribute to real-world product teams.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Frontend: React.js, HTML5, CSS3

Backend: Django, Express.js

Databases: PostgreSQL, MySQL

DevOps & Tools: Docker, Git, GitHub, MinIO (Object Storage), Jenkins

Concepts: RAG (Retrieval-Augmented Generation), Bot Detection

WORK EXPERIENCE

Authority (Internship)

Apr 2024 – Feb 2026

Frontend Developer :

- Engineered responsive, accessible UI components using React.js, serving internal dashboard users across multiple devices and screen sizes.

Human Bot Detection System :

- Designed and implemented a 4-layer bot detection engine (Behavioral, Network, Browser, Temporal layers) with site-key/secret-key-based secure verification — achieving a low false-positive rate in adversarial testing.
- Validated system robustness against Selenium, Playwright, and Puppeteer stealth automation bots through structured adversarial test campaigns.
- Integrated RESTful API endpoints between React.js frontend and backend services, ensuring seamless data flow and secure authentication.

PROJECTS

Tork AI — Multimodal RAG Enterprise Knowledge Platform

- Architected a full-stack multimodal RAG platform enabling organizations to ingest, index, and retrieve knowledge across text, image, audio, and video — built with React.js (frontend) and Django REST Framework (backend).
- Implemented semantic search using PostgreSQL with pgvector extension, enabling context-aware document retrieval using vector embeddings — achieving fast, accurate results across large enterprise document sets.
- Designed MinIO-based scalable object storage layer for binary asset management (images, videos), with presigned URL-based secure access control.
- Built multimodal ingestion pipeline with unified retrieval interface, enabling cross-modal semantic queries in a single API call.
- Ranked 14th out of 200 teams at MSSU I Spark Ideation Competition (Startup Ideation) for this project.

EDUCATION

Ratan Tata Maharashtra State Skills University (RTMSSU), Kharghar

2023 – Present

B.Tech in Computer Technology | CGPA: 7.8

JVM Mehta College, Navi Mumbai

2021 – 2023

HSC (PCM) | 71.67%

Smt. Sushiladevi Deshmukh Vidyalaya, Airoli Navi Mumbai

2020 – 2021

SSC | 79.80%

CERTIFICATIONS

- **Artificial Intelligence** – Information Technology Specialist – Certiport (Feb 2025)
- **Databases** – Information Technology Specialist – Certiport (Aug 2024)
- **HTML and CSS** – Information Technology Specialist – Certiport (Jul 2024)

ACHIEVEMENTS

- Ranked 14th out of 200 teams — MSSU I Spark Ideation Competition (Startup Ideation) for Tork AI, a multimodal RAG enterprise platform.
